ANNUAL REPORT OF THE MEDICAL OFFICER OF HEALTH.

To the Chairman and Members of the Public Health Committee,

Mr. Chairman, Lady and Gentlemen,

I have the honour to present the Annual Report on the Health and Sanitary Circumstances of the Rural District of Stokesley for the year ending 31st December, 1953.

Perusal of the vital statistics shows that the general state of health has been satisfactorily maintained. The most pleasing feature is the sharp rise in the birth rate which, I hope, is a reflection on the Council's housing policy and the increased number of homes available for young married people. The main adverse observation relates to the increase in infant mortality, although not high (29.0) it compares badly with the phenomenally low figure obtained last year. Details of infant deaths are given in the body of the report but it does serve to emphasise the constant care and vigilance required.

Notifications of Measles and Whooping Cough increased considerably during the year but these epidemics were not of a severe type. Scarlet Fever is again becoming noticeable among the notifications but with modern methods of treatment it no longer represents a public health problem and, indeed, it is rapidly losing its identity among such allied conditions as streptococcal sore throat and tonsillitis.

Unfortunately there were 2 cases of Poliomyelitis during the year, one of which was fatal. General medical opinion regarding the spread of Poliomyelitis is that it is by healthy carriers distributing the virus by direct contact. This leads me to stress the importance of thoroughly washing the hands before eating and preparing food. How often does one still see people leaving the toilet without the elementary decency of washing the hands, and in how many hotels and food preparing premises is the provision of an attractively clean towel and soap conspicuous by its absence. If the general public had the courage to refuse to partake of food in the homes of friends or in other places where such a low standard of hygiene is practised, I feel sure that the incidence of Poliomyelitis and other diseases caused by direct contamination would soon lessen.

On the subject of the care of the aged, more the prerogative of the Local Health Authority and Regional Hospital Board, the presence of these old people living alone and in unsanitary conditions, is becoming an ever increasing problem. Urban areas are fortunate in being able to procure home helps reasonably easily and there is no doubt that an efficient home help service materially eases this problem. In country areas however, the policy of good neighbourliness still largely applies and, laudable though this policy may be, it makes it extremely difficult to obtain suitable persons to act as part-time home helps when such neighbourliness is not forthcoming. This problem, however, is not peculiar to this district, but in my opinion, and in the opinion of those whose business it is to obtain accommodation for such aged and infirm persons, the position is now much worse than when hospitals were under the direct administration of the local authority and the Relieving Officer was obliged to find suitable accommodation.

Dealing with the sanitary circumstances of the district, I am pleased to say that with possibly one exception, all water samples were bacteriologically pure, however, chemical analysis continues to stress the dangers of plumbosolvency.

The completion of Normanby Road Sewage Schemes and the abolition of 50 cesspools has relieved a long standing nuisance and virtually all properties in the parish are connected to main drainage.

Developments in other parts of the district are having to resort to septic tank drainage and the implementation of drainage and sewage disposal schemes are anxiously awaited.

Finally may I express my thanks to all members of the Council, Officials, Doctors and Nurses for their co-operation and help during the year.

I am, Mr. Chairman, Lady and Gentlemen,

Your obedient Servant,

J. W. A. RODGERS,

Medical Officer of Health.

General Provision of Health Services for the Area.

(a) LABORATORY FACILITIES:

During the year the Council made use of the arrangements offered by the Public Health Laboratory at the General Hospital, Middlesbrough, in respect of diagnosis of pathological specimens.

(b) AMBULANCE COVERAGE FOR STOKESLEY & STOKESLEY AREA:

Covered by N.R.C.C. Ambulance—Stationed at THORNABY: Stainton, Maltby, Hilton.

Covered by N.R.C.C. Ambulance—Stationed at NORTHALLERTON: Ingleby Arncliffe, E. Rounton.

Covered by Durham C.C. Ambulance—Stationed at STOCKTON: Yarm. Crathorne. Worsalls. Kirkleavington.

Covered by S.J.A.B. Ambulance stationed at SOUTH BANK (known as ESTON AMBULANCE):

Marton. Ormesby. Nunthorpe.

Covered by S.J.A.B. Ambulance—Stationed at GREAT AYTON:

Great Ayton. Stokesley. Great Broughton. Kirby. Easby. Ingleby Greenhow. Hutton Rudby. Newby. Seamer. Bilsdale. Kildale.

(c) NURSING IN THE HOME:

The day to day administration of the Home Nursing, Health Visiting and Domiciliary Midwifery Service is dealt with by the Local Health Sub-Committee. The following Nurses undertake these duties:—

Nurse Mather—Great Ayton and District.
Nurse Reavley—Hutton Rudby and District.
Nurses Scott and Petty—Nunthorpe, Ormesby, Marton.
Nurses Westbrook and Heath—Stokesley and District.
Nurse Wetherell—Whorlton District.
Nurse Inglis—Yarm and District.

HOME HELPS:

3 cases have had the services of a Home Help during the year—1 maternity case at Nunthorpe and 2 free cases at Ormesby and Ayton respectively.

TREATMENT CENTRES AND CLINICS:

The North Riding County Council Ante-Natal and Infant Welfare Clinics in the Rural District are held as follows:—

INFANT WELFARE CLINICS:

Yarm—every Wednesday.
Stokesley—fortnightly on Mondays.
Ormesby—fortnightly on Wednesdays.
Great Ayton—1st and 3rd Thursdays each month.
Hutton Rudby—3rd Tuesday in month.
East Rounton—2nd Tuesday in month.
Nunthorpe—alternate Wednesday.

ANTE-NATAL CLINICS:

Yarm—every Wednesday. Ormesby—fortnightly on Wednesdays. Stokesley—fortnightly on Mondays.

INFANT MORTALITY:

Breakdown of this year's Infant Mortality figure:—

Deaths of Infants under 1 year:

Broncho Pneumoni	a	• • •				2

Sanitary Circumstances of the Area.

1. (i) WATER:

The Council's Water Schemes collect water in four areas in the hills in the southern area of the district.

These are spring supply of exceptionally good quality. Due to the acidity and lack of carbonate hardness, however, precautions are taken at treatment plants on each scheme to reduce the corrosive action on metals.

Water collected from Turkey Nab is stored at a reservoir at Ingleby Greenhow and coupled to a second reservoir at Carlton. This system also takes the supply from Mere Beck springs, Faceby, and in the subsequent details of connections are shown as Turkey Nab and Mere Beck.

Water collected from three sets of springs is shown as the Scugdale Supply, and the third system of supply is Kildale Village.

The yields from these springs have been sufficient to maintain supplies during the year.

CONNECTIONS:

There has been a steady increase in connections to the mains, quite a few of which are in respect of agricultural holdings, and it is estimated that over 90% of the properties and the population are now served with piped water supply to the houses.

CHEMICAL ANALYSIS OF WATER.

-			
No.	Date of Sampling	I ADDRESS	SUMMARY OF ANALYST'S REPORT.
1.	27.1.53	White House, Great Ayton. Tap in scullery, private supply: land spring.	Subject to confirmation by bacteriological examination, essential in this case, the present condition of this water is satisfactory for drinking purposes. There is no objectionable metallic contamination which may give rise to complaint, but it is noted that the water is acid with significant action on lead. Any lead service pipe should be replaced.
2.	17.3.53	Reservoir, Kildale. Stokesley R.D.C. Supply.	According to results, the present condition of this water is satisfactory for public supply.
3.	24.3.53	Summerhill Farm, Great Ayton. Private supply, direct from spring.	According to results, the present condition of this water is fit for drinking and general domestic purposes, but on account of the acidity, due precaution should be taken against the corrosive and plumbosolvent activity.
4.	20.5.53	Clogger Hall Farm, Ingleby Greenhow. Moorland Spring.	Subject to confirmation by bacteriological examination, results show that the present condition of this water is satisfactory for drinking purposes. On account of the acidity, though not very marked, due precaution against plumbosolvent action is desirable.
5.	31.8.53	Scarth Leas Farm, Swainby.	Subject to confirmation by bacteriological examination, the water is satisfactory for drinking. Because of acidity and lack of carbonate hardness, due precaution against plumbosolvent and corrrosive action on metals is necessary.
6.	3.12.53.	East Angrove Farm, Great Ayton. Well supply—Private.	According to the above results, the condition of this water was satisfactory for drinking and general domestic purposes at the time of examination. However, on account of the acidity and lack of carbonate hardness, due precaution against plumbosolvent and corrosive action on metals is necessary.

29.	28.9.53	Urra, Bilsdale. Tap in scullery— private supply.	Highly satisfactory.

(ii) DRAINAGE AND SEWERAGE:

Sewage Disposal Works are in operation in Parishes as detailed below:-

POSITION OF WORKS.	AREA SERVED.
Cargo Fleet Lane, Ormesby Gipsy Lane, Marton.	Part of Parish of Ormesby. Part of Parishes of Marton, Nunthorpe and Ormesby.
Tollesby Lane, Marton.	Part of Parish of Marton.
Great Ayton	Parish of Great Ayton.
Great Busby	Village of Great Busby.
Kirkleavington.	Village of Kirkleavington.
Stokesley.	Town of Stokesley.
Yarm	Worsall Road area and Council Housing Estate.
Maltby.	Stainton and Maltby.

The new Sewage Disposal Works at Maltby have been completed during the year. These works receive the sewage from Stainton and Maltby Parishes and improvements are already noted in the conditions there.

SEWERAGE—ORMESBY (NORMANBY ROAD).

The pumping station receiving the sewer from the rear of properties at Normanby Road, Ormesby, has been completed during this year. Fifty properties have connected to this sewer after the demolition of cesspools, thus relieving a long outstanding cause of complaint.

PROPOSED SEWERAGE SCHEME (SPRINGFIELD, STOKESLEY).

Owing to proposed building development at Springfield and Meadowfield areas of Stokesley, it has been found necessary to relay the section of sewer in Springfield, this will enable a small estate of some 64 houses to be developed.

PROPOSED SEWERAGE SCHEMES.

The proposed schemes of sewerage for the villages of Kirby and Great Broughton, Swainby, Carlton, Hutton Rudby, Seamer, Yarm and Ingleby Greenhow, for which application for provisional allocation of grants under the Water Supplies and Sewerage Act, 1944, have already been made, are still in the hands of the Ministry.

All these villages are on a public piped water supply and the sewerage conditions have been the subject of adverse reports for many years. It is hoped that substantial grants will be made available and sanctions given for the schemes to go ahead to relieve the danger to public health, and also improve the amenities of these villages.

(iii) CLOSET ACCOMMODATION:

The Council have again continued their offer of grants of half the cost up to £8 to property owners for converting pail closets and privies to water closets, and in the parishes where sewers and drains are available, there has been a steady progress and details of conversions are given below:—

PARISH.	No. of conversions
Great Broughton Stokesley Stainton Nunthorpe Great Ayton Crathorne Hutton Rudby Skutterskelfe Hemlington Kirby Ingleby Cross	1 2 6 1 5 1 1 1 1
То	tal 2 8

(iv) CLEANSING OF RIVERS AND STREAMS:

The work has been carried out in the following parishes during the year:-

River Leven, Great Ayton.

River Leven, Stokesley.

Streams at Great Broughton, Carlton and Swainby.

It is regretted that where these streams flow through villages the practice of depositing rubbish and refuse still persists despite warning notices which are being displayed, and what could be a beauty spot is marred by the sight of disused household articles, debris and other rubbish.

(v) PUBLIC CLEANSING:

The Council undertake the collection of household refuse throughout the district and for the work use two Karrier, C.K.3 10 c.yd. and one Dennis 10 c.yd. vehicles. These three vehicles are fitted with double cabs for the transport of loaders. A Dennis 10 c. yd. vehicle is held in reserve.

Besides the drivers a crew of three loaders is normally carried. A weekly collection of bins and pans is carried out throughout the district, with the exception of part of 2 Parishes where bins are collected fortnightly. It is hoped that this service will be improved, but there are many problems in a rural area such as long collecting journeys with scattered properties, and long returns to a disposal point, which tend to make these services very expensive.

A Summary of work carried out during the year is set out herewith:—

Vehicle.	Days Working	Loads	Bins	Pans	Ashpits
J.P.Y. 578	308	577	51646	32617	4540
E.P.Y. 419	308	6773	66010	14119	3772
E.P.Y. 877	308	926	90520	9579	1540
	924	21803	208176	56315	9852

The refuse is disposed of at tips (i) Quarry Farm, Nunthorpe, which is a disused Whinstone Quarry, and (ii) Howe Hill Farm, Seamer, which is a worked-out sand pit. These tips are maintained in a satisfactory manner and no complaints of nuisance have been received during the year.

SANITARY INSPECTION OF THE AREA.

(vii) HOUSING AND NEW BUILDINGS:-

Further to the greater publicity given to the Housing Act of 1949, more active enquiries have been received regarding financial grants under Section 20.

These have resulted in six formal applications being received and, after due consideration, grants have been made in respect of four, one has been refused and one is pending at the end of the year.

By Stokesley Rural District Council.

PARISH.	Completed.	Under Construction at End of Year.

INSPECTION AND SUPERVISION OF FOOD.

(a) MILK SUPPLY:

Under the Milk and Dairies Regulations, 1949 and the Milk (Special Designation) (Raw Milk) Regulations, 1949 and the Milk (Special Designation) (Pasteurised and Sterilised Milk) Regulations, 1949, the local authority are responsible for the distributive side and issuing of supplementary licences in respect of the two later Regulations.

Milk (Special Designations) Regulations, 1949. Dealer's Licenses.

Licences to use the Special Designations, "Tuberculin Tested" "Accredited" "Pasteurised and Sterilised" in relation to milk sold from premises in the area, have been issued as follows:—

Tuberculin Te	sted				8
Accredited	• • •		• • •	• • •	1
Pasteurised	• • •	• • •			9
Sterilised					3

Supplementary Licences.

Supplementary licences to use the Special Designations in relation to milk sold within the Stokesley district from premises outside the area have been issued as follows:—

Tuberculin Tested		• • •		3
Accredited	• • •		• • •	
Pasteurised	• • •		• • •	3
Sterilised			• • •	2

MILK AND DAIRIES (SPECIAL DESIGNATION) ORDERS.

From information received from the County Medical Officer of Health, licences have been issued under the Milk (Special Designation) Orders, as detailed below:—

Accredited Tuberculin	• • •	• • •	•••	24 113
			-	137

It is considered that this very high percentage of designated producers shows a high standard of dairy farming in the district, and one reason is the large number of farms that have taken advantage of the Council's water schemes and have a piped main water supply on to the premises.

(b) FOOD AND DRUGS ACT, 1938.

ICE CREAM (HEAT TREATMENT) REGULATIONS:

During the year 4 licences have been issued to retailers of ice-cream. In all instances the premises have been inspected and the condition of the licence is that the ice-cream is pre-packed and is sold from approved refrigerated cabinets.

There are 3 registered manufacturers within the area.

(c) MEAT AND OTHER FOODS:

Since the adoption of the Meat Distribution Scheme by the Ministry of Food, slaughtering has ceased within the area, all meat supplied to butchers in the area being drawn from the Distributing Centre at Middlesbrough and the local butchers distributing from one centre.

The only inspections of slaughter within the area have been emergency cases and, where the carcase has been found fit for food, it has been sent to the Distributing Centre for disposal.

The unsound meat detailed in the following table is returned to the distributing centre. This centre returns it to the Allocation Committee for a claim for reimbursement. The articles of tinned food are destroyed.

32 visits were made in respect of inspections of food.

The following table gives details of foods that were found to be unsound and voluntarily surrendered.
